

Scintillating talk by Prof Akhtar Kalam of Victoria University Australia at Gautam Buddha University Greater Noida

On 30th January 2015 IEEE-GBU SB and School of Engineering organized an expert lecture by an Australian Professor. The topic of the talk was “Research, Industrial Collaboration and Sharing Experience”. Prof Kalam shared his knowledge and experience in various specializations of Electrical Engineering, especially for Power Systems and related areas. He also talked about the importance and benefits of membership of professional bodies’ viz. IEEE and IETE etc. **More than 300 students and around 50 faculty members** grabbed the benefit of attending the scintillating lecture. It was an interactive session and students of GB University enthusiastically participated in the activity. The students asked several queries regarding their final year project selection and industry collaboration, which shows the curiosity and eagerness of Gautam Buddha university students. Students and faculty members of GB University will definitely going to take privilege of this informative conversation and interface.
